

Local Snapshot

Pacific County Positive Cases: 1059
New Cases since May 19, 2021: 12
Pacific County Active Cases: 8
Pacific County Hospitalizations to Date: 43
Pacific County Deaths 12

The Pacific County Emergency Operations Center is Open Monday - Friday, 8:00am - 4:00pm
Please give us a call with any COVID-19 related questions or concerns.

North County: (360) 875-9407 / South County: (360) 642-9407.

If you are experiencing a medical, or, other type of emergency, please contact 9-1-1 immediately. If no one is available to take your call during regular business hours please leave a message and someone will get back to you within 3 business days.

If you have other questions about COVID-19 in Pacific County, email us at info1@pacificcountyhealth.com.

Statewide Snapshot

WA State Total Positive Cases as of 06/08/2021: 441,591 WA Total Hospitalizations: 24,619
WA Total Deaths: 5,785 Neighboring Counties: Wahkiakum County 139 cases, Grays Harbor 4,493 cases, Lewis County 5,088 cases, Clatsop County 1021 cases. Clatsop County will remain in the "Lower Risk" category of state-mandated COVID-19 business and social guidelines beginning Friday, June 11 through at least June 17, based on the local rate of new infections. Under the Lower Risk designation, restaurants, gyms and indoor entertainment establishments may operate at 50-percent capacity, and faith institutions may allow up to 75-percent of capacity.

For the most recent tally of cases by county, demographics, and more, visit the [Department of Health's dashboard](#) and the state's [Roadmap to Recovery Metrics dashboard](#).

Pacific County Weekly COVID 19 Data

Pacific County Case Data Summary	5/26/2021	6/2/2021	6/9/2021
Cases (Total)	1044	1047	1059
Active cases (currently monitored by Public Health)	27	15	8
New cases over last 14 days	31	20	18
Number of cases since January 1, 2021 among fully vaccinated people	13	15	17
Total number of cases since January 1, 2021	422	428	441
Proportion of total cases since January 1, 2021 that were among fully vaccinated people	3%	4%	4%
Hospitalizations (Total)	41	43	43
New hospitalizations over last 7 days	1	1	0
Deaths (Total)	12	12	12
Cases per 100k per 14 days	143.3	92.4	83.2

Statement from the Washington State Department of Health

The Washington State Department of Health (DOH) recognizes many people have experienced challenges while trying to confirm their records were transmitted to the Washington State Immunization Information System (WAIIS) and they are eligible for the “Shot of a Lifetime” lottery drawing. DOH also recognizes that many people were not able to verify their COVID-19 vaccine record in MyIR Mobile. However, the records have been transmitted to the WAIIS, which means DOH is able to access immunization data and will be able to pull winners from the pool of eligible vaccine recipients in the state.

In the meantime, people who have further questions about their eligibility should call the state’s vaccine hotline at 1-833-VAX HELP or visit <https://walottery.com/vaccination>.

Washington joins several other states in offering a vaccine lottery. Hitting the 70% statewide initiation of vaccination goal is an important component of our collective success against COVID-19, and we look forward to continued progress so we can restore our economy and get people back to living their normal lives.

Vaccination helping to control spread of COVID-19 and needs to increase

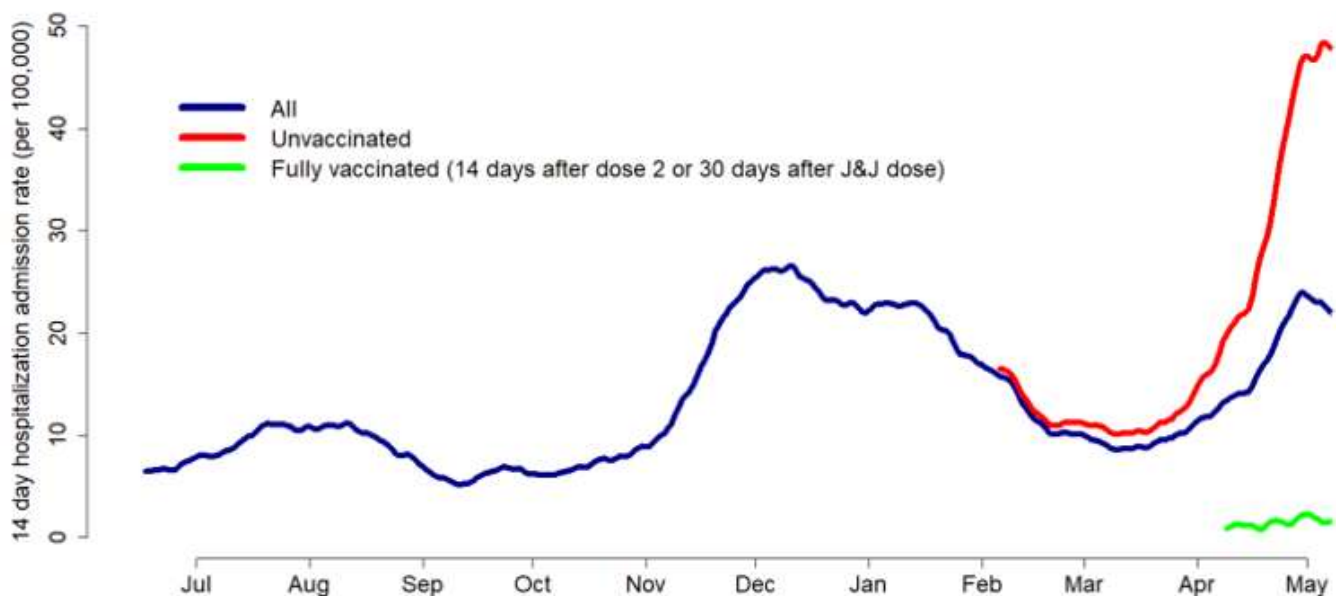

The latest [COVID-19 modeling and surveillance situation report](#) from the Washington State Department of Health (DOH) shows continued declines in disease activity, with vaccination playing a key role. To keep trends on track, we need to keep increasing vaccination and continue preventive measures like wearing masks, maintaining distance and moving gatherings outside if you’re unvaccinated.

Report findings include:

- **Statewide case counts and hospital admissions continued to decline as of May 20.** Case counts were either flat or declining in most counties, and 31 of 39 counties had fewer than 200 new cases per 100,000 people over the previous two weeks.
- **Vaccination is protecting people from COVID-19 illness severe enough to require hospitalization.** Over the two-week period ending May 9, the hospital admission rate for unvaccinated people ages 45-64 was about 21 times higher than the rate for fully vaccinated people of the same age. Among people ages 65 and older, the hospital admission rate was about 13 times higher in unvaccinated people than in those who were fully vaccinated.
- **Increasing immunity from vaccination is playing an important role in reducing transmission.** On May 20, the best model-based estimate of overall population immunity was 43.5%. Estimated immunity from vaccination was more than twice as high as estimated immunity from prior infection.
- **While vaccination has helped reduce the spread of the virus, the level of transmission was still fairly high as of mid-May.** The best estimate of the reproductive number (which tells us how many new people each COVID-19 case will infect) on May 14 was 0.95. To keep seeing case and hospital admission rates decrease, the reproductive number needs to stay well below one for a substantial amount of time.
- **As of May 20, case rates were declining across all age groups except people ages 70 and older, among whom case rates have stayed mostly flat since March.** Hospital admission rates followed similar trends, declining among people ages 20-69 and remaining flat but high in ages 70 and older.

“We continue to see positive trends, but a significant proportion of our population is still unvaccinated and vulnerable to COVID-19 as our state approaches full reopening,” said Acting State Health Officer Scott Lindquist, MD, MPH. “If you haven’t been vaccinated yet, now is the time to get your vaccine so you can enjoy the benefits of reopening without putting your health and your community at risk.” DOH partners with the Institute for Disease Modeling, Fred Hutchinson Cancer Research Center, University of Washington and the Microsoft AI for Health program to develop these reports every other week. More COVID-19 data can be found on the [DOH data dashboard](#).

Hospitalization rate by vaccine status in those 45 to 64

New Clinics This Week

Provider: Willapa Harbor Hospital (Johnson & Johnson)

Location: 800 Alder Street, South Bend, WA

First dose: Call (360) 208-4045 to schedule your appointment

Second dose: N/A

Registration link: Call (360) 208-4045 to schedule an appointment

Provider: Raymond Pharmacy (Pfizer)

Location: 515 Commercial Street, Raymond, WA

First dose: June 8

Second dose: June 29

Registration link: Call (360) 942-2634

Provider: Raymond Pharmacy (Pfizer)

Location: 515 Commercial Street, Raymond, WA

First dose: June 16

Second dose: July 14
