

### Local Snapshot

Pacific County Positive Cases: 120

Pacific County Residents Tested: 3371

Probable Cases (Not Confirmed): 2

Pacific County Active Cases: 10

Pacific County Hospitalizations: 8

Pacific County Deaths 3

All counties in WA State have reported confirmed cases of COVID-19.

## Flu Vaccine Now Available for Uninsured Adults at No Cost

The Department of Health is collaborating with Safeway Inc. and Albertsons Companies LLC to offer [no-cost influenza \(flu\) vaccination for uninsured adults](#) over the age of 18 to help prevent flu illness during the COVID-19 pandemic. Health officials are concerned that the presence of both viruses could put more people in the hospital and strain Washington's health care system.

Twenty-three Albertsons and Safeway pharmacies across the state will offer flu vaccine free of charge through June 2021 to uninsured adults. The pharmacies will not charge an administration fee, and no proof of residency or immigration status will be required. Find the list of participating locations on the department's [website](#).

## Tips for a safe and fun Halloween from the Department of Health.

DOH wants Washington residents to have a fun Halloween while remembering a few key actions you can take to prevent the spread of COVID-19.

Protect yourself, your loved ones, and others while celebrating:

- **Wear a cloth face covering** anytime you are with people not from your household, whether indoors or outside.
- **Avoid confined spaces.** Outdoor activities are safer than indoor activities, but if you're indoors, make sure to have proper ventilation, and open doors and windows to the extent possible.
- **Avoid close contact with people outside of your household.** Stay at least 6 feet away from people who are not part of your household.
- **Wash or sanitize your hands (and the hands of little ones) often.**
- **Stay home if you are sick or were recently exposed to someone with COVID-19.** And if you have symptoms or you've been a close contact of someone with COVID-19, get a COVID-19 test.

Looking for creative ways to celebrate safely? DOH's [latest blog post on Halloween](#) might do the trick, or these [ideas for safer \(but still spooky\) good time](#).

## Inslee issues "Stay Safe - Vote Safe" proclamation.

Gov. Jay Inslee issued a [proclamation](#) and guidance [memo](#) today clarifying application of COVID-19 requirements for voters and for voting service operations, including county elections offices, county voting centers and student engagement HUBs throughout the state. Read the full news release [here](#).

---

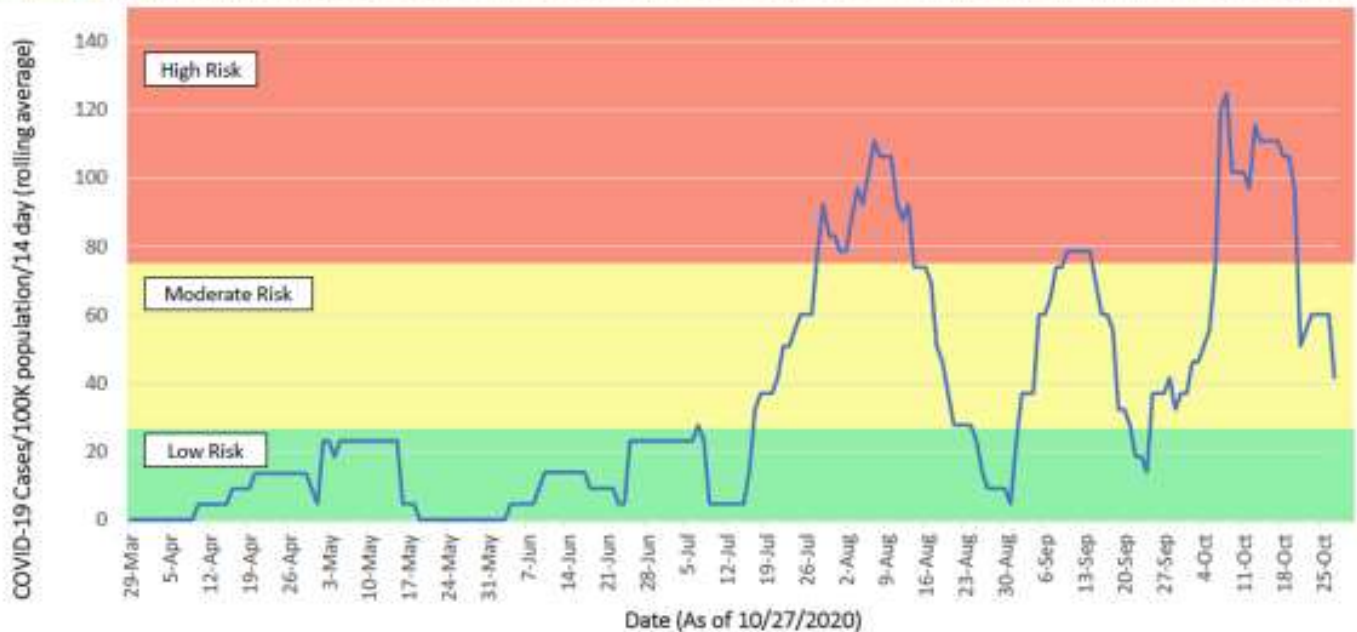

**\$2 million in COVID relief grants now open for nonprofits.** The COVID-19 pandemic has taken an unprecedented toll on nonprofit organizations, with many experiencing increased demand for services and programs while at the same time dealing with disruption of services and programs, cancellation of contracts, funding losses due to canceled fundraisers, reduced donations and other issues affecting staff and volunteer capacity. The impacts are particularly hard on nonprofits led by and serving Black, Indigenous and people of color (BIPOC) communities. Read the full news release [here](#).

### Oct. 31-Nov. 3 Razor Clam Digs Cancelled Due to Marine Toxins

OLYMPIA--Washington's ocean beaches will remain closed to razor clam harvest through at least Nov. 12 after test results on razor clams dug at Long Beach indicate levels of domoic acid that exceed the threshold (20 parts per million) set by state public health officials for safe consumption.

WDFW managers have cancelled digs previously anticipated for Oct. 31- Nov. 3 and await additional test results prior to announcing whether digs tentatively scheduled for Nov. 13-19 and beyond can move forward.

WDFW has already seen significantly higher than normal participation on recent digs. To avoid concentrating clam diggers and disproportionately increasing the risk of COVID-19, razor clam beaches are closed statewide--though only Long Beach clams exceeded safe concentrations of domoic acid levels so far.

"We know how important these opportunities are to Washington citizens and coastal communities, and we're looking to reopen as soon as it's safe to do so," said Larry Phillips, WDFW's coastal region director. "Yet, we also know that these toxins have a tendency to hang on – it's not inconceivable that we'll have to wait until December before we're clamming again. When that time comes, we're still going to need people to practice good social distancing behaviors as they visit coastal communities."

“Fortunately, we planned well, consulted communities and opened earlier in September,” said Philips. “What that means is razor clam diggers have already made more than 80,000 trips and harvested nearly 1.2 million clams this year.”

Domoic acid, a natural toxin produced by certain types of marine algae, can be harmful or even fatal if consumed in sufficient quantities. More information about domoic acid, as well as current levels at ocean beaches, can be found on [WDFW's domoic acid web page](#).

Final approval of tentatively scheduled openings depends on results of marine toxin tests conducted by Washington’s Department of Health (DOH).

Public health officials will also be closely monitoring COVID-19 infection rates throughout the digging season, and WDFW may make in-season adjustments to the schedule if necessary to reduce public health risks.
