****51 Additional Positive COVID-19 Cases in Pacific County* ***

November 30, 2020- Pacific County Public Health and Human Services has received notice of 51 additional positive cases of COVID-19 in Pacific County (19 probable, 32 confirmed). These cases are new since our last press release on 11/24 and are in addition to the 395 previously reported cases for a total of 446 cases since the beginning of the pandemic. There are currently 91 active cases being monitored by public health nurses. Probable cases include those who tested positive on a rapid test and confirmed cases include those who tested positive on a PCR test. Case investigations and contact tracing are on-going. Three of the cases are currently hospitalized with all other individuals isolating at home. Case investigations and contact tracing are on-going.

These cases bring Pacific County to an average (probable and confirmed) case rate of 905.7 per 100,000 population over the past 14 days. We continue to encourage the public to limit social gatherings, maintain social distancing of at least six feet between, and practice personal protective measures to include: correctly wearing a mask/face covering in public, washing hands often with soapy water for at least 20 seconds, and avoid touching your face. These safety measures, especially when taken together, can significantly reduce the risk of becoming infected with COVID or for those with COVID, reduce the risk of transmitting it to others. Active cases are spread throughout all parts of Pacific County with the majority of current cases in the north county area. Moving forward, we will release data three times per week with narrative updates (like this one) on Mondays and Fridays and full data release including zip code charts on Wednesdays.

Date Released	# released	cumulative to date (county count)	Case rate per 100,000 (on release date)	Probable (included in this release)	Confirmed (included in this release)	Active
