

**Local Snapshot**

Pacific County Positive Cases: 530

Pacific County Active Cases: 53

Pacific County Hospitalizations to Date: 17

Pacific County Deaths 3

All counties in WA State have reported confirmed cases of COVID-19.

---

**The Pacific County Emergency Operations Center is open Monday - Friday, 8:00am - 4:00pm**

Please give us a call with any COVID-19 related questions or concerns.

North County: (360) 875-9407 / South County: (360) 642-9407

If you are experiencing a medical, or, other type of emergency, please contact 9-1-1 immediately.

We are experiencing extremely high call volumes. If your call is not answered in person, please leave a message and you will receive a return phone call within 24 hours.

---

**Washington 211 COVID-19 Call Center**

Call for general information related to COVID-19. If you need information or have a general question, call 1-800-525-0127 or text 211-211 for help. You can also text the word "Coronavirus" to 211-211 to receive information and updates on your phone wherever you are. You will receive links to the latest information on COVID-19, including county-level updates, and resources for families, businesses, students, and more.

## **COVID-19 Safety Behaviors Remain Necessary, Even as Vaccinations Begin**

As the first COVID-19 vaccinations begin this week, the Washington State Department of Health is reminding people that it is very important to continue taking measures to prevent the spread of the virus. The initial distribution of vaccine is a major step forward. 20,475 doses arrived in the state as of noon today. While vaccines are a crucial tool in beating the virus, they can't be used alone at this time.

We must all continue doing the things that keep us safe and avoid giving in to COVID-19 fatigue. In order to continue flattening the curve, it is crucial that we all continue the infection control practices that have become a part of everyday life for so many of us this year. That means wearing our masks whenever we leave our home and carrying our hand sanitizer. We'll need to keep maintaining physical distance and reducing the time we spend indoors with people who don't live with us. Read the full news release [here](#).

---

## **No-cost Flu Vaccines for Uninsured Adults**

This year, it's more important than ever to get vaccinated against the flu. All adults 19 and older in Washington can now receive a flu vaccine at no cost, regardless of having insurance.

The Department of Health has teamed up with select Safeway and Albertsons pharmacy locations to offer flu vaccine at [no cost to those uninsured](#), or underinsured, to help keep you from getting sick or spreading the flu to others during the [COVID-19 pandemic](#). You may also be able to get a flu vaccine at no cost at other locations around the state. Check with your [local health department](#) for more information and clinics that may be offered in your area.

You can help prevent both flu and COVID-19 by washing your hands with soap and water for 20 seconds, covering your coughs and sneezes, staying home when sick, and wearing cloth face coverings when around other people. For more information on participating no-cost flu vaccine locations, please visit [www.knockoutflu.org](http://www.knockoutflu.org) for a list of pharmacies near you.

---

## **Inslee Issues Proclamation on Local Health Jurisdiction Stability**

Governor Jay Inslee today put a pause on most efforts to terminate agreements creating health districts and combined city-county health departments throughout the duration of the COVID-19 state of emergency.

[Proclamation 20-78](#) is based on the critical need to ensure continuity and stability of operations and services provided by local health jurisdictions during an unprecedented pandemic. This order is effective immediately and will remain in place during the state of emergency. Read the full news release [here](#).

---

## **Minimize the Spread of COVID-19 this Holiday Season**

Given the high rates of COVID-19 in Washington and around the country, our winter holiday celebrations need to look different than in years past. Many of the ways we traditionally celebrate the holidays include contact with non-household members in large group settings.

Regardless of how you choose to celebrate, it is important to keep the following in mind:

- Avoid close contact with people outside of your household. Stay at least 6 feet away from all other people who are not part of your household.
- Wear a cloth face covering anytime you are with people not from your household. This includes family members and close friends who do not live with you. Make sure the face covering fits snugly over your nose and mouth.
- Avoid confined indoor spaces. Outdoor activities are safer than indoor activities. If participating in an outdoor event is not possible and you choose to attend an indoor event, avoid crowded poorly ventilated, and fully enclosed indoor spaces. Increase ventilation by opening windows and doors if possible.
- Wash or sanitize your hands (and the hands of little ones) often.
- Stay home if you are sick or were recently exposed to someone with COVID-19. If you are sick, have symptoms of COVID-19, or have been in contact with someone who has been diagnosed with COVID-19, stay home and away from others.

More information on winter holidays and COVID-19 is available [here](#).

| <b>Pacific County Case Data Summary</b>   | <b>12/2/2020</b> | <b>12/9/2020</b> | <b>12/16/2020</b> |
|---|------------------|------------------|-------------------|
| <b>Cases (Total)</b>  | 457              | 484              | 530               |
| -Active Cases (currently monitored by Public Health)                                    | 98               | 37               | 53                |
| -Closed Cases (no longer monitored by Public Health)                                    | 359              | 447              | 477               |
| -Confirmed Cases (PCR positive)   | 278              | 307              | 349               |
| -Probable cases (Rapid positive)  | 179              | 178              | 181               |
| <b>Hospitalizations (to date)</b>   | 16               | 16               | 17                |
| <b>Deaths</b>   | 3                | 3                | 3                 |
| -Percent Deaths (deaths/cases)  | .6%              | .6%              | .5%               |
| <b>Cases per 100k per 14 days (rolling)- includes PCR positives and Rapid positives</b> | 984.3            | 355.8            | 332.7             |

Data transition to include "Probable" as "COVID-19 Case" and to calculate average case rate per 100,000/14 days. No longer require PCR confirmation effective 11/25/20.

|                       |       |            |
|-----------------------|-------|------------|
| Bay Center            | 98527 | 6          |
| Chinook               | 98614 | 5 or fewer |
| Ilwaco                | 98624 | 23         |
| Long Beach            | 98631 | 48         |
| Lebam                 | 98554 | 5 or fewer |
| Naselle               | 98638 | 15         |
| Nahcotta              | 98637 | 5 or fewer |
| Menlo                 | 98561 | 5 or fewer |

| Raymond               | 98577 | 239        |
| South Bend            | 98586 | 132        |
| Tokeland              | 98590 | 5 or fewer |
| Incomplete/unassigned |       | 14         |

## Pacific County Cases by Zip Code

- Confirmed case count is specific to each zip code.
- Represents permanent residence of Pacific County COVID-19 cases.
- Not a representation of where COVID-19 exposure or transmission occurred.

*Updated 12/16/2020*

### WA Notify

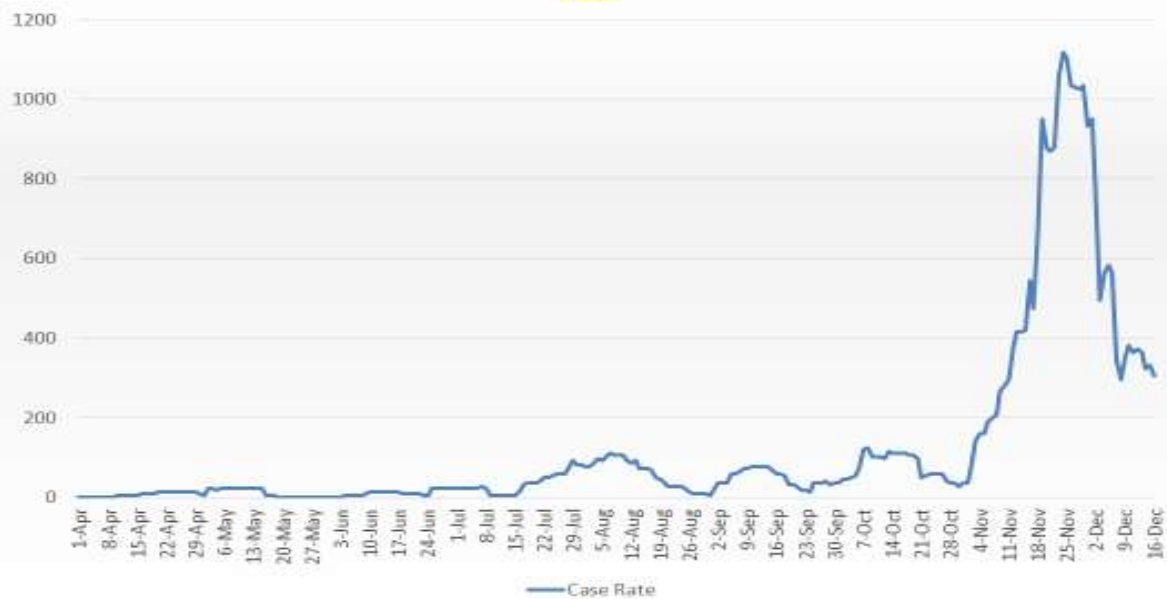

WA Notify can be enabled on your iPhone or downloaded as an app for your Android phone. It could tell you if you've been exposed to COVID. And if you test positive for COVID, it can alert other WA Notify users you may have exposed, without revealing any personal information.

### How it works

1. First, you add WA Notify to your phone.
2. Then if you happen to be near someone else who has WA Notify, both of your phones use Bluetooth Low Energy (BLE) technology to exchange random, anonymous codes.
3. If someone who has WA Notify on their phone tests positive for COVID and public health reaches out to them, they are given a verification code.
4. When they enter that code in WA Notify, anyone they were near in the last two weeks for a significant period of time who also has WA Notify will get an anonymous alert that they may have been exposed. Entering the code is completely voluntary.
5. If you test positive, you would enter your verification code in WA Notify to anonymously notify anyone you were near. [WA Notify Flow Chart \(PDF\)](#).

This process is completely anonymous. No one knows who gets notified when a verification code is entered. Visit [WANotify.org](http://WANotify.org) to learn more

## Pacific County Average Case Rate per 100,000 population over 14 days
