50-59	200
60-69	180
70+	158
Total	1582
Missing data	17

Updated 9/8/2021

# What you need to know if you have been exposed to COVID-19

You will be instructed to **quarantine for 14 days** after your last exposure to the person who tested positive. Under certain circumstances, individuals may be released early from quarantine. Please consult with a public health nurse to discuss your options.

---

Anyone who has had close contact with someone who has COVID-19 should be tested. Get tested as soon as possible if you have symptoms. If you do not have symptoms, it is best to **schedule your test 5 days after** your last exposure to decrease the chance of a false negative. Testing resources can be found at: [www.pacificcountycovid19.com/get-tested](http://www.pacificcountycovid19.com/get-tested)

---

**Call public health at 360-214-6013** if you have any questions about quarantine or if you have questions. We have staff available to help with grocery shopping, housing, or other needs to support you during quarantine!

## Pacific County Cases by Zip Code
