Pacific County Cases by Zip Code

- Confirmed case count is specific to each zip code.
- Represents permanent residence of Pacific County COVID-19 cases.
- Not a representation of where COVID-19 exposure or transmission occurred.

Updated 2/2/2022

Do I need a BOOSTER?

	Who's eligible?	When should I get a booster?	Which booster?
If you got... Pfizer	Everyone 12+ should get their booster dose.	At least 5 months after completing the primary series of Pfizer vaccine.	Adults 18+ can get a booster dose of any COVID-19 vaccines (Pfizer or Moderna preferred). Children 12-17 should get a Pfizer booster.
If you got... Moderna	Adults 18+ should get their booster dose.	At least 5 months after completing the primary series of Moderna vaccine.	A booster dose of any COVID-19 vaccines (Moderna or Pfizer preferred).
If you got... Johnson & Johnson	Adults 18+ should get their booster dose.	At least 2 months after completing the primary series of J&J vaccine.	A booster dose of any COVID-19 vaccines (Pfizer or Moderna vaccine is preferred over a J&J vaccine).

What to do if you are exposed to COVID:

IF YOU were exposed to COVID-19 and are NOT up-to-date on COVID-19 vaccinations (including boosters if eligible)

- Quarantine for at least 5 days**
 - Stay home for at least 5 full days.
- Get tested**
 - Get tested at least 5 days after close contact with someone with COVID-19.
 - If you can't get a test and have symptoms, assume you are positive and isolate.
- Take precautions until Day 10**
 - Wear a quality mask for 10 days while around others.
- Avoid travel**
- Avoid being around people who are high risk**

IF YOU were exposed to COVID and you are up-to-date on COVID vaccinations

- No Quarantine**
 - You do not need to stay home **unless** you develop symptoms.
- Take precautions until Day 10**
 - Wear a quality mask for 10 days when around others.
 - Get tested if you develop symptoms, or assume you are positive and isolate for 5 days.
- Avoid travel**
- Avoid being around people who are high risk**

IF YOU were exposed and had confirmed COVID within the past 90 days

- No Quarantine**
 - You do not need to quarantine **unless** you develop symptoms.
- Take precautions until Day 10**
 - Take precautions until Day 10.
 - Wear a mask for 10 days when around others.
 - If you develop symptoms, assume you are positive and isolate for 5 days.
- Avoid travel**
- Avoid being around people who are high risk**

What to do if you test positive:

For non-tested: If you are symptomatic or have been exposed to COVID-19 and unable to get a test, please assume you are positive and follow the advice below.

- Isolate at home, away from others.**
 - Isolate at least 5 days OR 24 hours after symptoms improve and no fever without fever-reducing medicine. **WHICHEVER IS LONGER.**
 - Day 1 of your isolation period begins the first full day after symptoms start.
 - Continue to wear a quality mask while around others until day 10.
- Reach out to your close contacts and let them know they've been exposed and they should quarantine.**
 - Quarantine for a minimum of 5 days from the last date of exposure.
 - If no symptoms by day 5, quarantine can end but continue to wear a face covering and monitor for symptoms until day 10.
 - If symptoms develop, get tested; if unable to test, assume you are positive & isolate.
 - Close contacts include anyone you were around who is not fully vaccinated for more than 15 minutes while you were infectious (2 days prior to when symptoms started).
- Wear a mask while inside and ask others in your home to do the same (preferably a KN95, KF-94, or a 3-ply surgical mask, if possible)**
- Ventilate your space as much as you can.**
 - If your home has an HVAC system, make sure it has a fresh filter. Consider using a HEPA air purifier if you don't have HVAC.
 - Open the windows and doors whenever possible and safe to do so.
 - Use fans to move virus particles from inside your home to outside.
- Stay hydrated, use OTC medications such as acetaminophen to manage symptoms. Seek medical care if you display the following symptoms:**
 - Trouble breathing
 - Persistent pain or pressure in the chest
 - Confusion, inability to wake or stay awake
 - Pale, gray, or blue-colored skin, lips, or nail beds (or an abnormally low reading on a pulse oximeter, if you have one)

*This list is not all possible symptoms. Call your medical provider if you have any other severe or concerning symptoms.
