

Local Snapshot

Pacific County Positive Cases: 3833
 New Cases since April 13: 22
 Pacific County Cases over 14 Days: 24
 Pacific County Hospitalizations to Date: 162
 New Hospitalizations this week: 2
 Pacific County Deaths: 55
 New Pacific County Deaths this week: 0
 Case rate per 100k/14 days: 134

Now that the mask mandate has been lifted, we've heard a lot of questions in the community about whether or not to keep wearing masks, so we've created a risk gauge to help inform that decision.

You may want to consider COVID-19 transmission in your community when considering whether or not to wear a mask. That tells you the probability that anyone in a given room has COVID-19.

- When case rates are high (>100/100,000 residents) it's a good idea to keep masking in indoor settings to protect yourself and others.
- When case rates fall below 100 per 100,000 it is safer for most people to begin unmasking in indoor spaces.
- For those at high risk of severe illness from COVID-19 or those with household members at high risk, recommend continuing to wear masks until case rates are very low (<50/100,000).

As of today, April 13th, Pacific County case rate is 134 over 14 days which puts us in the HIGH category.

Remember when the mask mandate was lifted on March 11th, masking is still required for staff and visitors in the following high-risk areas:

- ◆ Healthcare and medical facilities
- ◆ Long-term care settings
- ◆ Public transit, taxis, and rideshare vehicles
- ◆ Correctional facilities
- ◆ Private businesses and local governments that want to require masks for their employees, customers or residents

Private businesses can still require masks or proof of vaccination if they choose. Many individuals will choose to continue to wear masks for a variety of reasons. Please be kind, compassionate and respect the rules of the room.

Wearing a mask when COVID-19 case rates are high is an act of community. It offers protection not just for yourself but for those vulnerable members of our society around you. Let us keep practicing the care and compassion for our neighbors that has gotten us this far in the pandemic. As a reminder, high quality N95 masks are available free of charge for those who live or work in Pacific County. Pick yours up today at any Pacific County based Timberland regional library or either health dept location!

Updated Guidance from DOH

[Mask Guidance During COVID-19](#) has been updated to align with changes to the [Secretary of Health's mask order](#). This guidance includes information on health care settings and masking requirements.

The latest versions of the three following guidance documents have been translated* into 40 languages (listed below).

[What to do if you test positive for COVID-19](#)

[What to do if you were potentially exposed to someone with COVID-19](#)

Symptom Decision Tree for Non-Health Care Settings and the Public

The statewide indoor mask mandate has been lifted. Beginning March 12, masks are no longer required in most indoor public places. Masks will still be required in some settings like healthcare, public transportation, long term care, and jails, and some businesses may choose to continue requiring masks. You can support these local businesses and their staff by wearing a mask when asked.

Second COVID-19 booster dose recommended for certain individuals

People age 50 and older and certain immunocompromised individuals can now get a second booster dose of an mRNA (Pfizer-BioNTech or Moderna) COVID-19 vaccine at least four months after receiving their initial booster dose. The Washington State Department of Health (DOH) updated its booster dose recommendations following guidance from the U.S. Food and Drug Administration, the Centers for Disease Control and Prevention, and the Western States Scientific Safety Review Workgroup.

DOH's updated booster dose recommendations are as follows:

- Everyone 12 and older should receive a booster dose five months after completing their two-dose vaccine series of Pfizer or Moderna, or two months after receiving the single-shot Johnson & Johnson (J&J) vaccine.
- Everyone 50 and older can receive a second booster dose four months after receiving their first booster dose.
- Individuals 12 and older who are [moderately or severely immunocompromised](#) can receive a second booster dose four months after receiving their first booster dose.
- Those 18 and older who received a primary vaccine and booster dose of the J&J vaccine four months ago can receive a second booster dose of an mRNA COVID-19 vaccine.

Effective anti-COVID drug available in Washington for eligible patients. Thousands of doses of Evusheld, a potentially life-saving COVID-19 drug, are available in our state. Evusheld could benefit those who are at highest risk for hospitalization and death from COVID-19. [Read the full April 4 news release.](#)

At-Home COVID-19 Test Kits Available!

Pacific County Health Department in partnership with [Timberland Regional Library](#) and [Shoalwater Bay Medical Clinic](#) is pleased to announce the Pacific County at-home COVID test kit program. This program is in addition to the Washington State (www.sayyescovidhometest.org) and the federal

(www.covidtests.gov) at-home test kit programs and is limited to those who live or work in Pacific County. Beginning today, February 9th, individuals can pick up one test kit per person at the locations listed below. Each kit contains 2 rapid COVID tests that people can administer themselves at home. We recommend everyone has a home kit on hand in case they develop symptoms of COVID-19 or in case they are exposed to someone who tests positive. For those testing due to exposure to COVID-19, it is best to wait until day 5 after exposure to ensure the most accurate test results. If individuals test positive on their at-home test kit, we encourage them to report their positive result here: <http://www.pacificcountycovid19.com/repothometest.html>

Please note, if you are currently experiencing symptoms and need a test, call the front desk of the location you are picking up at upon arrival and a staff member will bring the kit out to your car- Please do not enter the building if you are symptomatic.

Naselle Timberland Library

4 Parpala Rd.

Naselle

360-484-3877 (if you are experiencing symptoms, please call when you arrive and someone will bring a test out to your car)

What to do if you are exposed to COVID:

IF YOU were exposed to COVID-19 and are NOT up-to-date on COVID-19 vaccinations (including boosters if eligible)

Quarantine for at least 5 days

- Stay home for at least 5 full days.

Get tested

- Get tested at least 5 days after close contact with someone with COVID-19.
- If you can't get a test and have symptoms, assume you are positive and isolate.

Take precautions until Day 10

- Wear a quality mask for 10 days while around others.

Avoid travel

Avoid being around people who are high risk

IF YOU were exposed to COVID and you are up-to-date on COVID vaccinations

No Quarantine

- You do not need to stay home unless you develop symptoms.

Take precautions until Day 10

- Wear a quality mask for 10 days when around others.
- Get tested if you develop symptoms, or assume you are positive and isolate for 5 days.

Avoid travel

Avoid being around people who are high risk

IF YOU were exposed and had confirmed COVID within the past 90 days

No Quarantine

- You do not need to quarantine unless you develop symptoms.

Take precautions until Day 10

- Wear a quality mask for 10 days when around others.
- If you develop symptoms, assume you are positive and isolate for 5 days.

Avoid travel

Avoid being around people who are high risk

What to do if you test positive:

For non-tested: If you are symptomatic or have been exposed to COVID-19 and unable to get a test, please assume you are positive and follow the advice below.

Isolate at home, away from others.

- Isolate at least 5 days OR 24 hours after symptoms improve and no fever without fever-reducing medicine: **WHICHEVER IS LONGER**
- Day 1 of your isolation period begins the first full day after symptoms start.
- Continue to wear a quality mask while around others until day 10.

Reach out to your close contacts and let them know they've been exposed and they should quarantine.

- Quarantine for a minimum of 5 days from the last date of exposure.
- If no symptoms by day 5, quarantine can end but continue to wear a face covering and monitor for symptoms until day 10.
- If symptoms develop, get tested if unable to test, assume you are positive & isolate.
- Close contacts include anyone you were around who is not fully vaccinated for more than 15 minutes while you were infectious (2 days prior to when symptoms started).

Wear a mask while inside and ask others in your home to do the same (preferably a KN95, KF-94, or a 3-ply surgical mask, if possible)

Ventilate your space as much as you can.

- If your home has an HVAC system, make sure it has a fresh filter. Consider using a HEPA air purifier if you don't have HVAC.
- Open the windows and doors whenever possible and safe to do so.
- Use fans to move virus particles from inside your home to outside.

Stay hydrated, use OTC medications such as acetaminophen to manage symptoms. Seek medical care if you display the following symptoms:

- Trouble breathing
- Persistent pain or pressure in the chest
- Confusion, inability to wake or stay awake
- Pale, gray, or blue colored skin, lips, or nail beds (or an abnormally low reading on a pulse oximeter, if you have one)

*This list is not all possible symptoms. Call your medical provider if you have any other severe or concerning symptoms.

More information at: www.pacificcountycovid19.com

Download printable copies at: <http://www.pacificcountycovid19.com/at-home-testing.html>

COVID-19 Home Testing

When to use your COVID-19 At Home Test :

- If you have COVID-19 symptoms, like a fever or cough, test right away.
- If you were a close contact of someone with COVID-19, wait at least 5 days to test.
- If you are testing before a gathering, test right before the gathering, or as close to the event as possible.

Please read the test instructions or watch the video below.
https://www.youtube.com/watch?v=qBt_H4Gc-rU

Reporting your positive results:

*Do not report negative results.

While we don't require individuals to report their at-home COVID-19 test results, we highly recommend people to do so, and to let close contacts know about potential exposure. Your honest responses help us understand how the virus is affecting you and your community.

Options to report an at home test:

- Report online using the QR code or directly at: www.pacificcountycovid19.com/reporthometest
- Call us at: (360) 875-9407

Use WA Notify to alert other users that they may have been exposed.
<https://www.doh.wa.gov/Emergencies/COVID19/WANotify>

Getting a COVID-19 vaccine after you recover from COVID-19 infection provides added protection for your immune system. You are eligible to receive a COVID-19 vaccine (or booster) once you have fully recovered from your COVID-19 infection. Schedule an appointment at:
www.pacificcountycovid19.com/get-vaccinated

Have more questions? Call us at (360) 875-9407 or visit:
www.pacificcountycovid19.com

Pruebas de hogar para el COVID-19

Cuando usar la prueba de detección de COVID-19 para el hogar:

- Cuando tenga síntomas del COVID-19, como fiebre o tos, hágase la prueba de inmediato.
- Cuando tenga contacto cercano con una persona que este positivo para el COVID-19, espere al menos 5 días para realizarse la prueba.
- Cuando se realice la prueba para una reunión, hágase la prueba antes del evento, o lo mas cerca al evento.

Por favor lea las instrucciones para la realización la prueba o vea el video siguiente
<https://www.youtube.com/watch?v=yGbw1uFPvY>

Como reportar un resultado positivo de COVID-19:

*No reporte un resultado negativo.

Aunque no es un requisito reportar su resultado positivo de COVID-19 de una prueba echa en casa, es recomendado que lo haga, y de hacerle saber a sus contactos cercanos de una posible exposición. Una respuesta honesta de su parte nos ayuda a entender como lo afecta el virus y como afecta a la comunidad.

Opciones para reportar una prueba de casa:

- Repórtelo en línea usando el código de QR o directamente en: www.pacificcountycovid19.com/reporthometest
- Llámenos al: (360) 875-9407

Usa Notifica WA para alertar a otros usuarios sobre una posible exposición.
<https://www.doh.wa.gov/Emergencies/COVID19/WANotify/Spanish>

Después de su infección de COVID-19 póngase la vacuna para proteger aún más su sistema inmunológico. Usted es elegible para recibir una vacuna del COVID-19 (o vacuna de refuerzo) cuando este recuperado de su infección de COVID-19. Haga una cita en:
www.pacificcountycovid19.com/get-vaccinated

¿Si tiene preguntas? Llámenos al (360) 875-9407 o visite:
www.pacificcountycovid19.com

COVID-19 Treatment Options

If you are high risk of severe illness due to COVID-19 (as defined below), call your provider to see if you are eligible!

Key points to know:

- Monoclonal antibody treatments (mAB) and oral antiviral medications are available in Pacific County
- Medical provider order is required
- Treatments are most effective if administered within the first few days of disease (the earlier the better)
- Those who are high risk due to age or certain underlying health conditions are eligible. Talk to your provider to see if they are right for you!

More information: <https://www.cdc.gov/coronavirus/2019-ncov/your-health/treatments-for-severe-illness.html>

Home care for COVID-19: Guide for family and caregivers

| | | | |
|--|--|--|--|
|  <p>Identify one household member to be the caregiver. The caregiver should have no high risk factors and the fewest contacts with people outside.</p> |  <p>Prepare a separate room or isolated space for the person with COVID-19 infection.</p> |  <p>Open a window(s) to improve ventilation and increase the circulation of fresh air.</p> |  <p>Do not allow visitors and try to avoid close contact (less than 1 metre) with the person with COVID-19 infection.</p> |
|  <p>Everyone should wear a medical mask when in the same room with the person with COVID-19 infection.</p> |  <p>Clean hands frequently using soap and water or an alcohol-based hand sanitizer.</p> |  <p>Clean and disinfect frequently touched surfaces, especially those touched by the person with COVID-19 infection.</p> |  <p>Use separate dishes, cups, eating utensils and bedding from the person with COVID-19 infection.</p> |
|  <p>The person with COVID-19 infection should rest, drink plenty of fluids, and eat nutritious food, continue any medication for chronic conditions.</p> |  <p>Take paracetamol/acetaminophen for fever and/or body pain according to instructions. Antibiotics are not effective against COVID-19 infection.</p> |  <p>Monitor the person with COVID-19 infection's symptoms regularly. Call your healthcare provider immediately if you see any of these danger signs:</p> <ul style="list-style-type: none"> • Difficulty breathing • Chest pain • Confusion • Loss of speech or mobility | |

In some people there is a risk of more severe COVID-19.

High risk factors include:

- age 60 and over
- hypertension
- diabetes
- cardiac disease
- chronic lung disease
- cerebrovascular disease
- dementia
- mental disorders
- chronic kidney disease
- immunosuppression (including HIV)
- obesity
- cancer

During pregnancy, women over the age of 35, obesity, and chronic conditions are also **high risk factors**.

People who are infected with the **COVID-19 virus** and have any of these risk factors should be closely monitored by a health provider.

A pulse oximeter can be used to monitor oxygen levels.

- For people with **high risk factors**, check oxygen levels twice a day and report results to a health provider.
- Follow instructions on how to appropriately use the device.
- If the oxygen level on the screen is **less than 90%**, call for emergency help.
- If the oxygen level is **between 90-94%**, reach out to your health care provider for further guidance.
- For children, if the oxygen level is **less than 90%** plus a cough, difficulty breathing, inability to breastfeed or drink, lethargy or unconsciousness, or convulsions, call for emergency help.
