What to do if you are exposed to COVID:

IF YOU were exposed to COVID-19 and are NOT up-to-date on COVID-19 vaccinations (including boosters if eligible)

Quarantine for at least 5 days

- Stay home for at least 5 full days.

Get tested

- Get tested at least 5 days after close contact with someone with COVID-19.
- If you can't get a test and have symptoms, assume you are positive and isolate

Take precautions until Day 10

- Wear a quality mask for 10 days while around others

Avoid travel

Avoid being around people who are high risk

IF YOU were exposed to COVID and you are up-to-date on COVID vaccinations

No Quarantine

- You do not need to stay home **unless** you develop symptoms

Take precautions until Day 10

- Wear a quality mask for 10 days when around others.
- Get tested if you develop symptoms, or assume you are positive and isolate for 5 days

Avoid travel

Avoid being around people who are high risk

IF YOU were exposed and had confirmed COVID within the past 90 days

No Quarantine

- You do not need to quarantine **unless** you develop symptoms.

Take precautions until Day 10

- Take precautions until Day 10
- Wear a mask for 10 days when around others.
- If you develop symptoms, assume you are positive and isolate for 5 days

Avoid travel

Avoid being around people who are high risk

What to do if you test positive:

For non-tested: If you are symptomatic or have been exposed to COVID and unable to get a test, please assume you are positive and follow the advice below. .

Isolate at home, away from others.

- Isolate at least 5 days OR 24 hours after symptoms improve and no fever without fever reducing medicine **WHICHEVER IS LONGER**
- Day 1 of your isolation period begins the first full day after symptoms start
- Continue to wear a quality mask while around others until day 10

Reach out to your close contacts and let them know they've been exposed and they should quarantine.

- Quarantine for a minimum of 5 days from the last date of exposure.
- If no symptoms by day 5, quarantine can end but continue to wear a face covering and monitor for symptoms until day 10.
- If symptoms develop, get tested. If unable to test, assume you are positive & isolate.
- Close contacts include anyone you were around who is not fully vaccinated for more than 15 minutes while you were infectious (2 days prior to when symptoms started)

Wear a mask while inside and ask others in your home to do the same (preferably a KN95, KF-94, or a 3-ply surgical mask, if possible)

Ventilate your space as much as you can.

- If your home has an HVAC system, make sure it has a fresh filter. Consider using a HEPA air purifier if you don't have HVAC.
- Open the windows and doors whenever possible and safe to do so.
- Use fans to move virus particles from inside your home to outside.

Stay hydrated, use OTC medications such as acetaminophen to manage symptoms. Seek medical care if you display the following symptoms:

- Trouble breathing.
- Persistent pain or pressure in the chest.
- Confusion, inability to wake or stay awake.
- Pale, gray, or blue-colored skin, lips, or nail beds (or an abnormally low reading on a pulse oximeter, if you have one.)

*This list is not all possible symptoms. Call your medical provider if you have any other severe or concerning symptoms.
