# Pacific County COVID-19 Community Risk Level

COVID-19 Community Levels in Pacific County, Washington

Time Period: COVID-19 Community Levels were calculated on Thu May 12 2022. New COVID-19 cases per 100,000 population (7-day total) are calculated using data from Thu May 05 2022 - Wed May 11 2022.

CDC Community Risk data is slightly delayed compared with local "Case Rate per 100 thousand" data and uses a 7 day average compared to the case rate over 14 days.

## What to do if you are exposed to COVID:

**IF YOU were exposed to COVID-19 and are NOT up-to-date on COVID-19 vaccinations (including boosters if eligible)**

### **Quarantine for at least 5 days**

- Stay home for at least 5 full days.

### **Get tested**

- Get tested at least 5 days after close contact with someone with COVID-19.
- If you can't get a test and have symptoms, assume you are positive and isolate

### **Take precautions until Day 10**

- Wear a quality mask for 10 days while around others

### **Avoid travel**

**Avoid being around people who are high risk**

**IF YOU were exposed to COVID and you are up-to-date on COVID vaccinations**

### **No Quarantine**

- You do not need to stay home **unless** you develop symptoms

### **Take precautions until Day 10**

- Wear a quality mask for 10 days when around others.
- Get tested if you develop symptoms, or assume you are positive and isolate for 5 days

### **Avoid travel**

**Avoid being around people who are high risk**

**IF YOU were exposed and had confirmed COVID within the past 90 days**

### **No Quarantine**

- You do not need to quarantine **unless** you develop symptoms.

### **Take precautions until Day 10**

- Take precautions until Day 10
- Wear a mask for 10 days when around others.
- If you develop symptoms, assume you are positive and isolate for 5 days

### **Avoid travel**

**Avoid being around people who are high risk**

## What to do if you test positive:

**For non-tested:** If you are symptomatic or have been exposed to COVID and unable to get a test, please assume you are positive and follow the advice below. .

### **Isolate at home, away from others.**

- Isolate at least 5 days OR 24 hours after symptoms improve and no fever without fever reducing medicine **WHICHEVER IS LONGER**
- Day 1 of your isolation period begins the first full day after symptoms start
- Continue to wear a quality mask while around others until day 10

### **Reach out to your close contacts and let them know they've been exposed and they should quarantine.**

- Quarantine for a minimum of 5 days from the last date of exposure.
- If no symptoms by day 5, quarantine can end but continue to wear a face covering and monitor for symptoms until day 10.
- If symptoms develop, get tested. If unable to test, assume you are positive & isolate.
- Close contacts include anyone you were around who is not fully vaccinated for more than 15 minutes while you were infectious (2 days prior to when symptoms started)

### **Wear a mask while inside and ask others in your home to do the same (preferably a KN95, KF-94, or a 3-ply surgical mask, if possible)**

### **Ventilate your space as much as you can.**

- If your home has an HVAC system, make sure it has a fresh filter. Consider using a HEPA air purifier if you don't have HVAC.
- Open the windows and doors whenever possible and safe to do so.
- Use fans to move virus particles from inside your home to outside.

### **Stay hydrated, use OTC medications such as acetaminophen to manage symptoms. Seek medical care if you display the following symptoms:**

- Trouble breathing.
- Persistent pain or pressure in the chest.
- Confusion, inability to wake or stay awake.
- Pale, gray, or blue-colored skin, lips, or nail beds (or an abnormally low reading on a pulse oximeter, if you have one.)

\*This list is not all possible symptoms. Call your medical provider if you have any other severe or concerning symptoms.

# COVID-19 Treatment Options

*If you are high risk of severe illness due to COVID-19 (as defined below), call your provider to see if you are eligible!*

Key points to know:

- Monoclonal antibody treatments (mAB) and oral antiviral medications are available in Pacific County
- Medical provider order is required
- Treatments are most effective if administered within the first few days of disease (the earlier the better)
- Those who are high risk due to age or certain underlying health conditions are eligible. Talk to your provider to see if they are right for you!
