# COVID-19 Cases, Hospitalizations, and Deaths by Vaccination Status

## Washington State Department of Health

September 14, 2022

Unvaccinated **12-34 year-olds** in Washington are

- 1.8 times more likely to get COVID-19 compared with fully vaccinated 12-34 year-olds.
- 3.7 times more likely to be hospitalized with COVID-19 compared with fully vaccinated 12-34 year olds.

Unvaccinated **35-64 year-olds** are

- 1.7 times more likely to get COVID-19 compared with fully vaccinated 35-64 year-olds.
- 3.7 times more likely to be hospitalized with COVID-19 compared with fully vaccinated 35-64 year olds.

Unvaccinated **65+ year-olds** are

- 2.2 times more likely to get COVID-19 compared with fully vaccinated 65+ year-olds.
- 3.4 times more likely to be hospitalized with COVID-19 compared with fully vaccinated 65+ year-olds.
- 4 times more likely to die of COVID-19 compared with fully vaccinated 65+ year-olds.

## VACCINATIONS

Where and when are vaccinations being given?

How many people are getting vaccinated?

Who is getting vaccinated?

### COVID-19 IN WASHINGTON STATE

Where and when are vaccinations being given?

DATA AS OF 9/21/2022 11:59:00 PM PT

This chart shows the number of COVID-19 vaccines given in Washington state facilities and reported to the state. Not all COVID-19 vaccines given in Washington are reported to the state. Vaccine doses given reflects the data as of the latest update date. Please note, the measures "vaccines given" and "people vaccinated" are not comparable. People vaccinated counts the number of Washington residents initiating a vaccine series, completing their primary series, and receiving a booster. Numbers may not always align since people may live in a different county than where they got vaccinated. Vaccination data is updated on Wednesdays and Fridays only. [Learn More](#)

### COVID-19 IN WASHINGTON STATE

Initiated Primary Series (Received At Least 1 Dose of Primary Series)

DATA AS OF 9/21/2022 11:59:00 PM PT

This chart shows the number of people in Washington who have initiated their primary series. People who have initiated their primary series represent the total number of people who have received at least one dose of any type of COVID-19 vaccine. Individuals who have completed their primary series are included in the count of both initiated and completed. Please note, the measures "vaccines given" and "people vaccinated" are not comparable. Vaccines given counts the number of doses given in a location. People vaccinated counts the number of Washington residents who have initiated their primary series, completed their primary series, and received a booster. Numbers may not always align since people may live in a different county than where they got vaccinated. [Learn More](#)

# SARS-CoV-2 Variant Proportions in WA

## COVID-19 Omicron Variant Update

BA.5 continues to be the dominant variant with BA.4 and BA.4.6 as the next two most prevalent.

Findings for BA.5, BA.4 and BA.4.6 have shown an increased ability to evade immune response from both initial vaccinations and prior infections.

However, the current bivalent vaccine booster is specifically designed for and very effective against these Omicron variants.

[Scheduling information here.](#)

## What to do if you are exposed to COVID:

**IF YOU were exposed to COVID-19 and are NOT up-to-date on COVID-19 vaccinations (including boosters if eligible)**

### **Quarantine for at least 5 days**

- Stay home for at least 5 full days.

### **Get tested**

- Get tested at least 5 days after close contact with someone with COVID-19.
- If you can't get a test and have symptoms, assume you are positive and isolate

### **Take precautions until Day 10**

- Wear a quality mask for 10 days while around others

### **Avoid travel**

**Avoid being around people who are high risk**

**IF YOU were exposed to COVID and you are up-to-date on COVID vaccinations**

### **No Quarantine**

- You do not need to stay home **unless** you develop symptoms

### **Take precautions until Day 10**

- Wear a quality mask for 10 days when around others
- Get tested if you develop symptoms, or assume you are positive and isolate for 5 days

### **Avoid travel**

**Avoid being around people who are high risk**

**IF YOU were exposed and had confirmed COVID within the past 90 days**

### **No Quarantine**

- You do not need to quarantine **unless** you develop symptoms.

### **Take precautions until Day 10**

- Take precautions until Day 10
- Wear a mask for 10 days when around others.
- If you develop symptoms, assume you are positive and isolate for 5 days

### **Avoid travel**

**Avoid being around people who are high risk**

## What to do if you test positive:

**For non-tested:** If you are symptomatic or have been exposed to COVID and unable to get a test, please assume you are positive and follow the advice below. .

### **Isolate at home, away from others.**

- Isolate at least 5 days OR 24 hours after symptoms improve and no fever without fever reducing medicine **WHICHEVER IS LONGER**
- Day 1 of your isolation period begins the first full day after symptoms start
- Continue to wear a quality mask while around others until day 10

### **Reach out to your close contacts and let them know they've been exposed and they should quarantine.**

- Quarantine for a minimum of 5 days from the last date of exposure.
- If no symptoms by day 5, quarantine can end but continue to wear a face covering and monitor for symptoms until day 10.
- If symptoms develop, get tested. If unable to test, assume you are positive & isolate.
- Close contacts include anyone you were around who is not fully vaccinated for more than 15 minutes while you were infectious (2 days prior to when symptoms started)

### **Wear a mask while inside and ask others in your home to do the same (preferably a KN95, KF-94, or a 3-ply surgical mask, if possible)**

### **Ventilate your space as much as you can.**

- If your home has an HVAC system, make sure it has a fresh filter. Consider using a HEPA air purifier if you don't have HVAC.
- Open the windows and doors whenever possible and safe to do so.
- Use fans to move virus particles from inside your home to outside.

### **Stay hydrated, use OTC medications such as acetaminophen to manage symptoms. Seek medical care if you display the following symptoms:**

- Trouble breathing.
- Persistent pain or pressure in the chest.
- Confusion, inability to wake or stay awake.
- Pale, gray, or blue-colored skin, lips, or nail beds (or an abnormally low reading on a pulse oximeter, if you have one.)

\*This list is not all possible symptoms. Call your medical provider if you have any other severe or concerning symptoms.

# COVID-19 Treatment Options

*If you are high risk of severe illness due to COVID-19 (as defined below), call your provider to see if you are eligible!*

Key points to know:

- Monoclonal antibody treatments (mAB) and oral antiviral medications are available in Pacific County
- Medical provider order is required
- Treatments are most effective if administered within the first few days of disease (the earlier the better)
- Those who are high risk due to age or certain underlying health conditions are eligible. Talk to your provider to see if they are right for you!

More information: <https://www.cdc.gov/coronavirus/2019-ncov/your-health/treatments-for-severe-illness.html>
